SKILLS SUMMARY

- Programming & Query: Python (pandas, scikit-learn, etc.), R, SQL, Java
- Analytics & Modeling: Predictive modeling, regression analysis, machine learning, model validation, webscraping, API integration
- Visualization & Reporting: Tableau, Power BI, Power Query, Excel (advanced modeling), Microsoft Office Suite
- Business Systems: Salesforce, Gainsight

EDUCATION

Master of Applied Business Data Analytics Expected: May 2027
University of Arkansas Graduate School, Fayetteville, AR
Bachelor of Science in Data Science, Concentration in Business Data Analytics May 2026
University of Arkansas Honors College, Fayetteville, AR | GPA 3.8/4.0, *magna cum laude*

WORK EXPERIENCE

Customer Success Strategy Intern, Commvault, Remote May 2026 - Present

- Built a global headcount model weighting regional coverage and language capabilities which drove the hiring of 5 Customer Success Managers
- Automated QBR reporting in Python and Excel, cutting 8 hours of manual process to 10 minutes
- Rebuilt a renewal prediction metric, improving forecast accuracy by 10%

Graduate Assistant, University of Arkansas, Fayetteville, AR August 2026 - Present

- Taught twice-weekly R labs for 30 undergraduates in an applied Calculus III course focused on linear algebra
- Built lab curriculum, translating lecture topics into R exercises that automate matrix and vector computations
- Graded labs and held Q&A, reinforcing linear algebra concepts both by hand and in R

Logistics Intern, Poet Biofuels, Wichita, KS May 2025 - August 2025

- Coordinated daily with carriers and customers to schedule ethanol deliveries and resolve issues
- Automated manual data entry processes using Power Query, saving 2+ hours per week
- Managed terminal positions and assigned over 300 truck hauls weekly to ensure efficient operations
- Analyzed raw data using PowerBI to identify trends and recommend process improvements

PROJECTS

University of Arkansas Campus Police Optimization - Python Spring 2025
Optimized police placement to minimize emergency response times. Converted raw crime data into a structured CSV file and developed a Pyomo optimization model in Python. The model evaluates both crime frequency and severity to recommend optimal officer locations based on the number of officers on duty.

Arkansas Army National Guard Retention - Python and Machine Learning Spring 2026
Built a negative binomial regression model to predict expected National Guard Enlistment by Arkansas county based on county-level economic and demographic factors; this compared the predicted against actual counts to isolate underperforming areas to give leadership a data-driven basis for reallocation of resources.

AI Facial Modeling Thesis - Python, Machine Learning, API Spring 2026
A comparative study testing whether machine learning (Convolutional Neural Network) can reliably distinguish AI-generated celebrity faces from authentic photographs, and identify which visual features give synthetic images away. Built the datasets from scratch using APIs and webscraping, then trained and interpreted separate classifiers for four celebrities across different races and genders

ACTIVITIES

Arkansas Delta Delta Delta Sorority Fall 2023 - Spring 2026
Honors College Ambassador Fall 2023 - Spring 2026
Mathematics Tutor Fall 2020 - Present
Arkansas Data Science Association Fall 2023 - Spring 2026
Event Design & Planning Fall 2025 - Present
